

SIGLENT Technologies celebrates the grand opening of its new North American operations center in North Plains, Oregon.

Siglent Technologies Press Release

September 29, 2026 – North Plains, OR USA

Siglent Technologies continues investing in global capabilities and partnerships that support our customers across the world with the grand opening of our new North American operations center in North Plains, Oregon. Our new North American operations center in North Plains, Oregon includes over 13,000 square feet of space including sales and support offices, a new calibration and service center, and warehousing.

In 2014, Siglent established subsidiaries in the US and Germany followed by Japan in 2022. These regional offices support customers around the world with the quality, capability, and value that Siglent is known for. In 2025, Siglent established a full-process production facility in Penang, Malaysia that manufactures instruments for our global customers.

“This year, our new investment in US capabilities will lay the foundation for years of future growth while providing engineers with access to solutions for their everyday measurement challenges.” says Mike Rizzo, Siglent USA General Manager.

Siglent continues to grow aggressively, providing test and measurement solutions to customers from education to semiconductors. This new operations center will enable us to support even more engineers as we continue a period of strong growth and lay the foundation for an even stronger future.

From oscilloscopes and function generators to spectrum and network analyzers, SIGLENT is a global leader in the design and manufacture of electronic test and measurement instruments that provide high accuracy data, dependable quality, and a smart user interface at prices that deliver value for many years.

There will be a grand opening celebration at our new facility on September 29th, 2026.
